INVESTMENT FUND EXPERIENCE

MELIORA FUND, SIMON BUSINESS SCHOOL — **Rochester, NY**
Investment Analyst — ***Dec 2024 – May 2025***
- Selected and tracked 20+ public equities across healthcare, fintech, energy and TMT sectors, performing valuation and sensitivity analysis to support a simulated ~$100K student-managed portfolio
- Developed quarterly recommendation reports on market trends, company catalysts, and rebalancing triggers, presenting findings to club leadership and the investment committee
- Built multi-year operating and valuation models for top holdings, assessing TAM expansion, margin trajectory, competitive dynamics, and strategic catalysts to strengthen long/short investment theses
- Led weekly sector research pods of 6–8 analysts, assigning coverage, running pitch reviews, and coordinating stock-pitch sessions, culminating in a semester-end competition judged by faculty and industry mentors

SIMON VENTURE FUND, SIMON BUSINESS SCHOOL — **Rochester, NY**
Venture Capital Analyst — ***Nov 2024 – May 2025***
- Screened 50+ seed-stage startups using proprietary deal funnel, leveraging university alumni and accelerator network to build prioritized pipeline across SaaS, AI, and climate-tech verticals
- Supported investment evaluation for 3 early-stage startups by analyzing unit economics, churn patterns, burn-rate runway, and competitive moat, summarizing insights in decision-ready investment committee memos
- Created dilution and return waterfall models for early-stage deal structures, evaluating founder vs investor outcomes across funding rounds and valuation tiers to assess ownership shifts and exit returns

PROJECTS

- **Cross-Asset Correlation Regime Decomposition Study -** Analyzed equity, bond, and commodity moves around CPI and Fed events to identify repeatable macro-driven positioning signals
- **Multi-Factor Regime-Based Tactical Allocation Framework -** Designed allocation framework rotating between equity, bond, commodity, and cash exposures based on macro regime signals (inflation trend, yield curve slope, volatility index), back-testing risk-adjusted performance vs 60/40 and risk-parity benchmarks
